

technical data sheet

PennWhite Ltd, Aston Way, Midpoint 18 Business Park, Middlewich, Cheshire, CW10 0HS

Description

Proverol is a high quality, food safe, moisture resistant synthetic lubricant

Applications

Proverol is formulated for use with commercial bakery prover and cooler chains/bearings/surfaces and other applications where effective lubrication in a high humidity environment is required.

Product Features

Proverol can be applied at temperatures between 10°C - 160°C and will provide effective lubrication up to operating temperatures of 180°C. It is compliant with FDA regulations for incidental contact with food in and around food processing areas.

Method of Use

Proverol should be applied by automatic applicator during normal operation of the equipment to be lubricated. This will ensure maximum penetration and minimises wastage of product.

Toxicity & Handling

Proverol is not classed as hazardous under current CLP regulations. Full details are available in the applicable Safety Data Sheet.

Storage, Shelf Life & Packaging

Proverol has a shelf life of 36 months when stored in original and unopened containers between 5°C and 30°C. It is available in 20kg packs.

Compliance

- FDA CFR 21 (173.3750 Lubricants with Incidental Food contact)

Typical Properties

- TBA: To be advised

Please note; these are typical properties only and should NOT be construed or used as a specification for this product.
